About Us

Sam Un

## About Us

The owner of the idea of our project lived a miserable and micerable alienation because of his inability to understand and harmonize with the new culture he lived. The only way through which he was able to overcome his problem was to read and learn the folk proverbs and the ancient wisdom of this culture alien to him until he was able, little by little, to plunge into the roots of the new culture and dive into the sea of its ancientness. After a while, he decided to implement thir project to help people from any country understand and accept the culture of any other country in an easy and entertaining way. This was the beginning of our journey with you.
